## Strength to Change the World

### Level 1C- The Basics

This is a beginner level program for anyone starting to build strength in a gym setting. Presented is a 13+ week program for anyone who has little to no resistance training experience. Level 1 begins by teaching a routine warm-up that promotes proper movement patterns and some basic strength exercises that will most effectively build full body strength. Here we will build a foundation that increases strength using the most effective exercises. With few exercises, the focus will be on practicing these new motions to become a safe and effective lifter. It is also a very adaptable level of training that allows you to train two, three or four days a week. The more training days you utilize (2x, 3x, or 4x weekly), out of the given options, the more effective the program will be. After completing this program you will have built a strong enough base to progress forward in your journey to gaining strength to change the world.

Presented in this program are four training days a week, each focused upon one strength motion. You will begin by practicing only the most effective exercises enabling you to learn proper movement patterns while building strength. As your neuromuscular proprioception, or muscle activation, increases you will then start to use more basic strength exercises that will build a strong foundation to lay your goals upon. For each training session make sure that you do the proper mobility and warm-up drills to increase the training's effectiveness. After completing the training session always remember to mobilize your tight tissues for at least 10+ minutes, with each stretch lasting longer than 2 minutes. It will take time for your body to adapt to all the new stimuli but you will continuously be growing stronger in the process. Also, after you have completed the first four weeks of training you are encouraged to try new things. Always complete the listed exercises first, but then feel free to try 1 or 2 more exercises that will help you gain strength in a similar way to the previous work. Just remember to be safe and have fun!
